

Get more from your Medicare coverage

With this plan you have access to online resources that help you use your plan with confidence. You can find all these documents, directories and other helpful resources on the UnitedHealthcare app or at myPreferredCare.com.

See what drugs are covered

Review the **Drug List (Formulary)** to find out what drugs are covered and any coverage rules.

- Medications are grouped by tiers — generally, lower-tier drugs cost less
- If your medication isn't on the list, there may be an alternative covered drug you can discuss with your provider

You can also use the online **Drug Cost Estimator** to:

- Look up covered medications
- View your estimated costs
- See if a lower-cost generic option is available

Confirm your providers are in the plan network

To help manage costs, make sure you use network doctors and specialists. If your current provider is not in the network, you will need to select a new one.

Check your pharmacy directory

If your pharmacy isn't in the network, switching to a network pharmacy can help ensure you receive the lowest cost available through your plan.

Review your plan details anytime

Your Summary of Benefits gives you an overview of many key plan features. For a complete picture — including coverage, costs, benefits and plan rules — your Evidence of Coverage is available online whenever you need it.
